

Target audience analysis

Study the portrait of the target customer. Starting from Where it happens, what social networks does he use, how old, etc.

Here is a CRM system to help. This will help you identify the most effective source of buyers faster.

SMM - marketing

Be active on the internet. Tell us about your services / products in social networks, write useful articles, shoot video reviews.

This will expand your potential customer base.

Amplifying content

Analyze the selling part
content: structure, text, photo

Selling techniques

Use psychological techniques in the selling text:
scarcity, exclusivity, authority, etc.

Process Automation

Spend more time on market analysis and strategy development strategy. Save on routine and operational tasks with a CRM system

Withdrawal of objections

Write in advance the text to frequent objections.

Work with customer feedback. Continuously improve product or service
